- Winner of **Higher Flyer Talent 2022** at Logix Built Solution PVT LTD.

## PROJECTS

### **Invstt** – <https://invstt.com/>

TECHNOLOGY: React js, Node js, mongoDB, AWS services

Invstt is a SaaS based platform where many founders come and share their ideas and startup details and also many investors come to attend founders webinar with zoom and get details of their startups. And invest in multiple startups and get shares round wise and create deals.

Also on this platform we give some credits on investment for access to this platform. So basically this platform is paid for investors and free for founders.

### **PowerPlaySystems** – <https://poweredfs.com>

#### **Admin Panel** – <https://administrator.powerplaysystems.com>

TECHNOLOGY: React js, Node Js, postgres, mongodb, sequelize ORM.

The Power play system is all about creating teams and winning real prizes. Basically users need to login and enter in any games with some cash or BTC or ETH, which is created by admin into the admin panel. There are four types of games available: MLB, NHL, NBA and NFL.

There is an admin panel where admin can create the contest and also manage users and games.

### **Safetree** – <https://safetree.in>

TECHNOLOGY: Vue js, node js, strapi, vuetify, Tailwind css

Safetree is one of the platforms which provides all types of insurances. There are mainly 3 types of insurance which are corporate, personal and posp.

The apis of safetree was built into nodejs and strapi.

### **AvBlox** – <https://avblox.com>

TECHNOLOGY: Angular, Node js, stripe payment gateway

AvBlox is a product that is used for subscription of particular plans which is set by the admin on that platform. This is a SaaS platform which provides a subscription system to clients.

There is a stripe payment gateway set into the frontend which gives users an easy and very effective experience for buying any subscription plan.
